

Guardian Digital Unveils Corporate Support and Services

New Commerce Services and Systems Management Solution Delivers Secure and Affordable System Support.

November 19, 2001 - Saddle River, New Jersey, USA - Guardian Digital, the first full-service Open Source Security company, today unveiled Guardian Digital Secure Network, a central location for receiving product information, support, and system software services.

Guardian Digital also today released its online commerce services, including the ability to obtain detailed product information and purchase products based on Guardian Digital's own EnGarde Secure Professional software directly online.

EnGarde Secure Professional is an integrated software solution that provides all the tools necessary to build a complete online presence, including DNS, Web, and e-mail services. The EnGarde Secure Workgroup Suite accompanies EnGarde Secure Professional as the reliable and robust platform for building a complete productivity collaboration environment.

The Guardian Digital Secure Network allows organizations to manage the software configuration of their EnGarde Secure Professional installations within their enterprise. "Organizations appreciate the ability to ensure their enterprise systems maintain their high degree of security and reliability while at the same time offering additional services and reduce the risk of intrusion and reliance on administrators," states Ryan W. Maple, Lead Systems Engineer, Guardian Digital.

Security issues are a critical component of doing business on the Internet, especially among data-sensitive businesses. Guardian Digital fills the void for applications that are used in areas where security, reliability, and data integrity are of the utmost importance.

The EnGarde Secure Professional edition is an affordable, complete and stable solution for medium and large organizations. EnGarde installs in less than 15 minutes, includes corporate DNS and mail management, SSL and key services, intrusion detection and gateway firewalling, and more.

Pricing and Availability

EnGarde Secure Professional is available for \$549 and is now shipping. The EnGarde Workgroup Suite, a product to accompany an EnGarde Secure Professional installation, is available for \$49.95 and is also now shipping.

The Guardian Digital Secure Network is available now for \$29.95 per month or \$219 per year. Annual System Support, available for \$795 per year including unlimited incidents, includes an annual Guardian Digital Secure Network subscription with the purchase price.

Guardian Digital provides comprehensive support, customized configuration, and authoritative advice required to get on the Web quickly.
