### **Guardian Digital Delivers Next Generation Enterprise Internet Server Solution**

*Award-Winning Integrated Linux Software Solution Offers Unsurpassed Levels of Security, Robust and Reliable Operation, and the Most Sophisticated Open Source Web-based Management System Available.*

**Saddle River, New Jersey -- June 10, 2002** -- Guardian Digital, Inc., the open source security company, has today released the next generation of its highly successfully EnGarde Secure Linux server operating system. EnGarde Secure Professional Release v1.2 is a comprehensive enterprise software solution that provides all the tools necessary to build a complete online presence.

Recently awarded the highly regarded Network Computing Editor's Choice award, the EnGarde Secure Professional integrated software solution provides organizations with a cost-effective and proven platform capable of supporting thousands of virtual Web sites and e-mail domains. Designed with security and ease of management as its primary focus, EnGarde allows organizations to increase productivity while reducing support costs.. The EnGarde Secure Workgroup Suite, also today released, accompanies EnGarde Secure Professional to form a complete intranet and collaboration environment.

This proven enterprise-ready solution marks EnGarde Secure Professional as the reliable and robust platform for building a complete corporate Internet presence.

"The ability to quickly and securely get online without requiring a Linux administrator or security engineer on staff, combined with the ability to build a robust intrusion detection device or firewall, marks EnGarde Secure Professional as a cost-effective enterprise solution for business," states Benjamin D. Thomas, Guardian Digital Project Manager.

The integrated Guardian Digital Secure Network service provides customers with the ability to quickly communicate with technical support resources, as well as install new software and apply product updates. Never before has it been easier to maintain a high level of security and confidence that an organization's servers are operating efficiently.

- more -

EnGarde Secure Professional offers the following enterprise features:

- Web, e-mail, database and DNS services, pre-configured for ISPs, ASPs, and fast-growing enterprises.
- Sophisticated Web-based management system enables organizations to build an online presence quickly and securely.
- Guardian Digital Secure Network provides access to the latest software updates, security notifications, technical support, and more.
- Security Control Center for configuring access control, SSL certificate and SSH key management functions, and more.
- Gateway firewall including Network Address Translation (NAT) and port forwarding to keep out cybervandals.
- The EnGarde Auditing System provides real-time audit information to quickly determine how the server is currently performing. This sophisticated application reveals system status information previously only available to system administrators.
- Secure by default ensures that only authorized users are permitted access to your corporate assets.
- Integrated network and host intrusion detection provides inherent protection from Trojan horses and protection from unauthorized system access.
- Comprehensive hardware support, including ISA, RAID, SCSI and USB.
- Increased internationalization supports global environments.

The EnGarde Secure Workgroup Suite, also today released, brings intranet and collaboration features to small organizations and IT workgroups. This secure and easy-to-use collection accompanies an existing EnGarde Secure Professional installation and includes WebMail, Windows file and print sharing, Windows Domain Controller support, Virtual Private Networking (VPN) using PPTP, user and filesystem quotas, and more.

EnGarde Secure Professional and the EnGarde Secure Workgroup Suite are available for ordering immediately from [guardiandigital.com](http://guardiandigital.com) and through distribution channels. EnGarde Secure Professional is available for \$549 and EnGarde Secure Workgroup is available for only \$49.95. All products include installation and configuration support within 60 days of purchase. Registered customers also receive a free trial to the Guardian Digital Secure Network.

EnGarde Secure Professional is also available in pre-configured turnkey rackmount Internet servers from Guardian Digital. The Guardian Digital Linux Lockbox is a highly reliable complete eBusiness solution, configured to address space-saving considerations at co-location facilities, ISPs, and ASPs.

Guardian Digital offers comprehensive support options for organizations choosing EnGarde as their Internet platform. Guardian Digital can help bridge the support gap between the fast-paced nature of the Internet, open source software development, security, and commerce. Guardian Digital offers Professional Consulting for organizations requiring customization assistance. Guardian Digital Enterprise support is available for authoritative answers to the most difficult questions.
