

Guardian Digital Signs Major UK Distributor for Internet Software

November 21, 2001 - Saddle River, New Jersey, USA - Guardian Digital, Inc., the open source security company, has today announced a key partnership with iTS-LiNIX, the premier Linux distributor in the United Kingdom. Terms of the partnership include exclusive rights to distribute Guardian Digital Internet server software, including EnGarde Secure Professional.

EnGarde Secure Professional is a comprehensive software solution that provides all the tools necessary to build a complete online presence.

Capable of supporting thousands of virtual Web sites, e-mail and DNS domains, this proven enterprise-ready solution marks EnGarde Secure Professional as the reliable and robust platform for building a complete corporate Internet presence.

Cheshire-based iTS-LiNIX is the nation's premier Linux distributor. "We are very excited to offer our customers Guardian Digital products. Our resellers have been looking for an enterprise-class open source server product that provides security and ease-of-use. We have found that in EnGarde Secure Professional and other accompanying products," said Andy Roffe, director of business relations, iTS-LiNIX.

"We are pleased to work with market-leader iTS-LiNIX," writes Benjamin D. Thomas, Guardian Digital corporate relations manager. "Meeting customer demand is a top priority for us, and iTS-LiNIX has extensive experience in assisting resellers across the United Kingdom in finding the best tool for the job."
